

Planning Commission Environment Committee Review of Electric Vehicle Charging Infrastructure

On July 19, 2011, the MITRE Corporation issued a report entitled "Electric Vehicle Charging Infrastructure Recommendations to Fairfax County." The report was prepared in partial fulfillment of a proffer commitment (RZ 2008-PR-011) to the support of county sustainability initiatives, particularly as they relate to the Tysons Corner Urban Center. The report was transmitted to the Board of Supervisors on August 18, 2011 and was referred by the board to the Planning Commission for review and recommendation. The Planning Commission tasked its Environment Committee with the review of the MITRE report.

The Planning Commission's Environment Committee has been reviewing MITRE's recommendations and their relationship to the county's land use policy. While the MITRE report focused on Tysons Corner, the committee's review has been countywide in scope. There has been a particular emphasis on the extent to which the policy concepts identified in MITRE's recommendations should be incorporated within Comprehensive Plan policy and implemented through the county's zoning process. The committee endorsed for public review and comment a draft white paper. It is anticipated that the white paper, once finalized and reviewed by the full Planning Commission, will serve as the Planning Commission's response to the board.

The Environment Committee will meet again on Wednesday, July 30, 2014 to discuss the electric vehicle charging infrastructure issue. The meeting will begin at 7:00 P.M. and will be held in the Board of Supervisors Conference Room in the Fairfax County Government Center, 12000 Government Center Parkway, Fairfax, VA.

If you wish to provide written comments on the draft white paper and/or MITRE report, please feel free to submit them by July 18, 2014 to the Planning Commission office.
